NAME

xlogo – X Window System logo

SYNOPSIS

xlogo [-*toolkitoption* ...]

DESCRIPTION

The **xlogo** program displays the X Window System logo. This program is nothing more than a wrapper around the *undocumented* Athena Logo widget.

OPTIONS

Xlogo accepts all of the standard X Toolkit command line options, as well as the following:

–**shape** This option indicates that the logo window should be shaped rather than rectangular.

RESOURCES

The default width and the default height are each 100 pixels. This program uses the *Logo* widget in the Athena widget set. It understands all of the Simple widget resource names and classes as well as:

foreground (class **Foreground)**
Specifies the color for the logo. The default is depends on whether *reverseVideo* is specified. If *reverseVideo* is specified the default is *XtDefaultForeground*, otherwise the default is *XtDefaultBackground*.

shapeWindow (class **ShapeWindow)**
Specifies that the window is shaped to the X logo. The default is False.

WIDGETS

In order to specify resources, it is useful to know the hierarchy of the widgets which compose **xlogo.** In the notation below, indentation indicates hierarchical structure. The widget class name is given first, followed by the widget instance name.

```
XLogo  xlogo
        Logo  xlogo
```

ENVIRONMENT

DISPLAY
to get the default host and display number.

XENVIRONMENT
to get the name of a resource file that overrides the global resources stored in the RESOURCE_MANAGER property.

FILES

/usr/openwin/lib/app-defaults/XLogo - specifies required resources
