**NAME**

labelit – list or provide labels for file systems

**SYNOPSIS**

**labelit** [ **–F** *FSType* ] [ **–V** ] [ **–o** *specific_options* ] *special* [ *operands* ]

**AVAILABILITY**

SUNWcsu

**DESCRIPTION**

**labelit** is used to write or display labels on unmounted disk file systems.

**OPTIONS**

The following options are supported:

**–F** *FSType*
: Specify the *FSType* on which to operate. The *FSType* should either be specified here or be determinable from **/etc/vfstab** by matching the *special* with an entry in the table. If no matching entry is found, the default file system type specified in **/etc/default/fs** will be used.

**–V**
: Echo complete command line. This option may be used to verify and validate the command line. Additional information obtained using a **/etc/vfstab** lookup is included in the output. The command is not executed.

**–o** *FSType-specific_options*
: Specify *FSType*-specific options in a comma separated (without spaces) list of suboptions and keyword-attribute pairs for interpretation by the *FSType*-specific module of the command.

**OPERANDS**

The following operands are supported:

*special*
: name should be the disk partition (for example, **/dev/rdsk/c0d0s6**). The device may not be on a remote machine.

*operands*
: *FSType*-specific operands. Consult the manual page of the *FSType*-specific **labelit**(1M) command for detailed descriptions. If no operands are specified, **labelit** will display the value of the labels.

**EXIT STATUS**

The following exit values are returned:

**0** Write or display of labels was successful.

non-zero An error occurred.

**FILES**

**/etc/vfstab**
: list of default parameters for each file system

**/etc/default/fs**
: default local file system type. Default values can be set for the following flags in **/etc/default/fs**. For example: **LOCAL=ufs**

**LOCAL:** The default partition for a command if no *FSType* is specified.

**SEE ALSO**

Manual pages for the *FSType*-specific modules of **labelit**

**NOTES**

This command may not be supported for all *FSTypes*.
