NAME

uucleanup – uucp spool directory clean-up

SYNOPSIS

/usr/lib/uucp/uucleanup [–**C***time*] [–**D***time*] [–**m***string*] [–**o***time*] [–**s***system*] [–**W***time*] [–**x***debug-level*] [–**X***time*]

DESCRIPTION

uucleanup will scan the spool directories for old files and take appropriate action to remove them in a useful way:

- Inform the requester of send/receive requests for systems that can not be reached.
- Return undeliverable mail to the sender.
- Deliver **rnews** files addressed to the local system.
- Remove all other files.

In addition, there is a provision to warn users of requests that have been waiting for a given number of days (default 1 day). Note: **uucleanup** will process as if all option *times* were specified to the default values unless *time* is specifically set.

This program is typically started by the shell **uudemon.cleanup**, which should be started by **cron**(1M).

OPTIONS

–**C***time* Remove any **C.** files greater or equal to *time* days old and send appropriate information to the requester (default 7 days).

–**D***time* Remove any **D.** files greater or equal to *time* days old, make an attempt to deliver mail messages, and execute **rnews** when appropriate (default 7 days).

–**m***string* Include *string* in the warning message generated by the –**W** option. The default line is "See your local administrator to locate the problem".

–**o***time* Delete other files whose age is more than *time* days (default 2 days).

–**s***system* Execute for *system* spool directory only.

–**W***time* Any **C.** files equal to *time* days old will cause a mail message to be sent to the requester warning about the delay in contacting the remote. The message includes the *JOBID*, and in the case of mail, the mail message. The administrator may include a message line telling whom to call to check the problem (–**m** option) (default 1 day).

–**x***debug-level* Produce debugging output on standard ouput. *debug-level* is a single digit between 0 and 9; higher numbers give more detailed debugging information. (This option may not be available on all systems.)

–**X***time* Any **X.** files greater or equal to *time* days old will be removed. The **D.** files are probably not present (if they were, the **X.** could get executed). But if there are **D.** files, they will be taken care of by D. processing (default 2 days).

FILES

/usr/lib/uucp	directory with commands used by **uucleanup** internally
/var/spool/uucp	spool directory
