
Solaris SDKs Now Available for SPARC and x86

Application developers can now obtain Solaris Software Developer Kits (SDKs) for SPARC and x86. The kits enable commercial and in-house developers to quickly build applications that exploit the power and features of the Solaris distributed computing environment; specifically windowing, distributed network services, graphics and imaging, and application integration facilities.

The SDKs include development software, tools, sample code, AnswerBook on-line documentation, and information about training and support.

The Solaris 2.3 SDK for SPARC includes:

- Motif® 1.2.2 Developer Toolkit
- OpenWindows™ Developer's Guide (DevGuide) 3.0.1
- Devguide Motif Utilities
- XIL™ 1.1 Imaging Library
- XGL™ 3.0.2 Graphics Library
- PEX 2.1 Graphics Library
- Solaris Developer AnswerBook
- Sample code
- Technical white papers

The Solaris 2.1 SDK for x86 includes:

- Motif 1.2.2 Developer Toolkit
- OpenWindows Developer's Guide (Devguide) 3.0.1
- Solaris Developer AnswerBook
- ToolTalk demos and sample code
- Migration tools and porting guides
- Technical white papers

The Solaris SDKs are priced at $495 each and are available on CD- ROM. The kits include media, installation manuals, and an RTU (right-to-use) license for one. Options for 10 and 25 RTUs as well as a co-package with SPARCworks/ ProWorks™ compilers are also available.

Product inquiries on the SDKs should be directed to SunSoft at 1- 800-227-9227 in the United States and to local offices in Europe and Asia.
